

Granahan US Small Cap Discoveries UCITS

31 October 2019

Investment Summary

GIM's Discoveries Fund is a long-only U.S. equity strategy that has a focus on emerging and unrecognized small cap growth companies. Utilizing in-depth, bottom-up, fundamental research and analysis, our team of seven small cap specialists utilize networks and sector expertise to uncover compelling growth opportunities in all areas of the U.S. small cap market, including the innovative biotech and med-tech industries. The Discoveries PM employs company-specific valuation parameters to build a portfolio of +70 stocks of these well-positioned companies.

Fund Highlights

- We believe that enterprise growth drives a company's stock price over the long term, while changes in market sentiment can provide opportunity in the short term. The investment process – with its focus on stock selection – incorporates both to construct a portfolio positioned for long-term capital appreciation.
- GIM casts a wide net to identify companies with strong growth potential, including in areas that other growth managers may shun, such as the smaller emerging growth companies.
- LifeCycle diversification is integral to the process, from idea generation to portfolio construction. Every company of interest is placed into one of three LifeCycle categories – Core Growth, Pioneer and Special Situation -- each with distinct performance drivers. LifeCycle diversification helps to mitigate risk in the portfolio, and allows us to focus on stock selection as the primary means to add value for our clients.

Portfolio Manager

Gary C. Hatton, CFA

37 Yrs. Experience Gary Hatton is co-Founder, Chief Investment Officer, and a Senior Managing Director of Granahan Investment Management. His research expertise is in the medical and biotechnology sectors.

About Granahan Investment Management

Founded in 1985, Granahan Investment Management, Inc. is a 100% employee-owned firm specializing in smaller cap equity investments for large institutions and wealthy individuals. The firm utilizes fundamental, bottom-up research to uncover and invest in fast growing companies under \$6 billion in market cap.

Monthly Commentary

Major U.S. stock market indexes hit new highs in October as concerns that had been weighing on the markets since early August receded. Rising productivity, strength in consumer spending, optimism for positive outcomes in both BREXIT and the US-China trade discussions, and this past year's monetary easing all helped to propel the markets upward. The Russell 2000 Growth benchmark returned +2.85%. The US Small Cap Discoveries Fund was also up but slightly underperformed with a return of +2.42%. Holdings in the Core Growth LifeCycle category performed well though not enough to offset poor performance from the portfolio's Pioneer holdings; the Special Situation category performed in line with the Index. LifeCycle diversification allows us to focus on stock selection, and we continue to seek well-positioned companies with strong growth prospects, and subsequently invest in the underlying stocks when risk/reward is attractive.
